STAT

MEMORANDUM FOR: Chairman, Technical Surveillance Countermeasures Subcommittee

FROM:

[redacted]
Chairman

SUBJECT:

Technical Threat Survey

[redacted] —
As we discussed recently, the IG/CM has raised the issue of whether SECOM is doing enough to determine the nature and extent of the FI threat of technical penetration. It would be very helpful if TSCS would formulate a tasking paper for technical surveillance similar to the one prepared by the Computer Subcommittee on the threat to computer security. [redacted] will work with you on this, as he assisted [redacted] with his tasking paper. Please get together with [redacted] as soon as practicable on this. We should ensure that the tasking is updated periodically as well. Your efforts, as always, are greatly appreciated.
